

Marco Roveri

Full Professor
Stratigraphy and Sedimentology
Earth Sciences Unit
Department of Chemistry, Life Sciences
and Environmental Sustainability (SCVSA)
University of Parma
Parco Area delle Scienze 157/A
43100 Parma (Italy)

Curriculum vitae

Born in Bologna (Italy) on September 1st, 1959, graduated in Geological Sciences at Bologna University on 1983, he joined Agip S.p.A on 1986, working in the Sedimentology Unit.

Researcher at the CNR Institute of Marine Geology from 1990 to 2000; in this position he participated to several scientific projects and cruises on board of CNR research vessels in the Mediterranean Sea as scientist and chief scientist.

Full Professor of Stratigraphy and Sedimentology at the Earth Science Department of the University of Parma (Italy) since 2000 (now Department of Physics and Earth Sciences).

President of GeoSed (Italian Association for Sedimentary Geology) from 2005 to 2008.

Member of the Commission for the National Scientific Abilitation 2012-2013 (ASN; area 04/A2).

He is currently coordinator of the Earth Sciences Scientific Committee of the University of Parma.

Research themes

Main research interests concern the sedimentology, physical-stratigraphy, palaeoceanography and palaeoecology of Neogene Mediterranean deposits, with particular attention to the problems related to the Messinian Salinity Crisis, the climatic control on high-frequency cyclicity of siliciclastic sedimentary successions and to the relationships between tectonics and sedimentation in syn-orogenic basins and their implications on facies distribution and stratigraphic architectures.

Research Projects

He has been Principal Investigator of:

2003 PRIN-Cofin Project "The late Messinian Lago Mare event: high-resolution stratigraphy, tectonic and climatic control on high-frequency paleoenvironmental changes related to the final stage of the Messinian Salinity Crisis of the Mediterranean area"

2006 PRIN-Cofin Project "Origin, timing and facies distribution of the Messinian Salt deposits in the basins of the central Mediterranean area (Sicily, Calabria and Tuscany) and their larger-scale implications for the Messinian salinity crisis"

2008 PRIN-Cofin Project "High-resolution stratigraphy, palaeoceanography and palaeoclimatology of the Mediterranean area during the Messinian salinity crisis" 2005-2008 - President of GeoSed, the Italian Association of Sedimentary Geology

2013 - Among the proponents of DREAM (Deep-sea Record of Mediterranean Messinian events)

He has collaborated with Industry (mainly oil companies; Eni, Petrobras, Edison) in several joint

projects (etc.) focused on outcrop analogs of hydrocarbon reservoirs.

Awards

Norman Falcon Award 2017

Eage Best Paper Award for the paper 'The Messinian salinity crisis: open problems and possible implications for Mediterranean petroleum systems', published in *Petroleum Geoscience*, volume 22, issue 4, November 2016, pp. 283-290.
