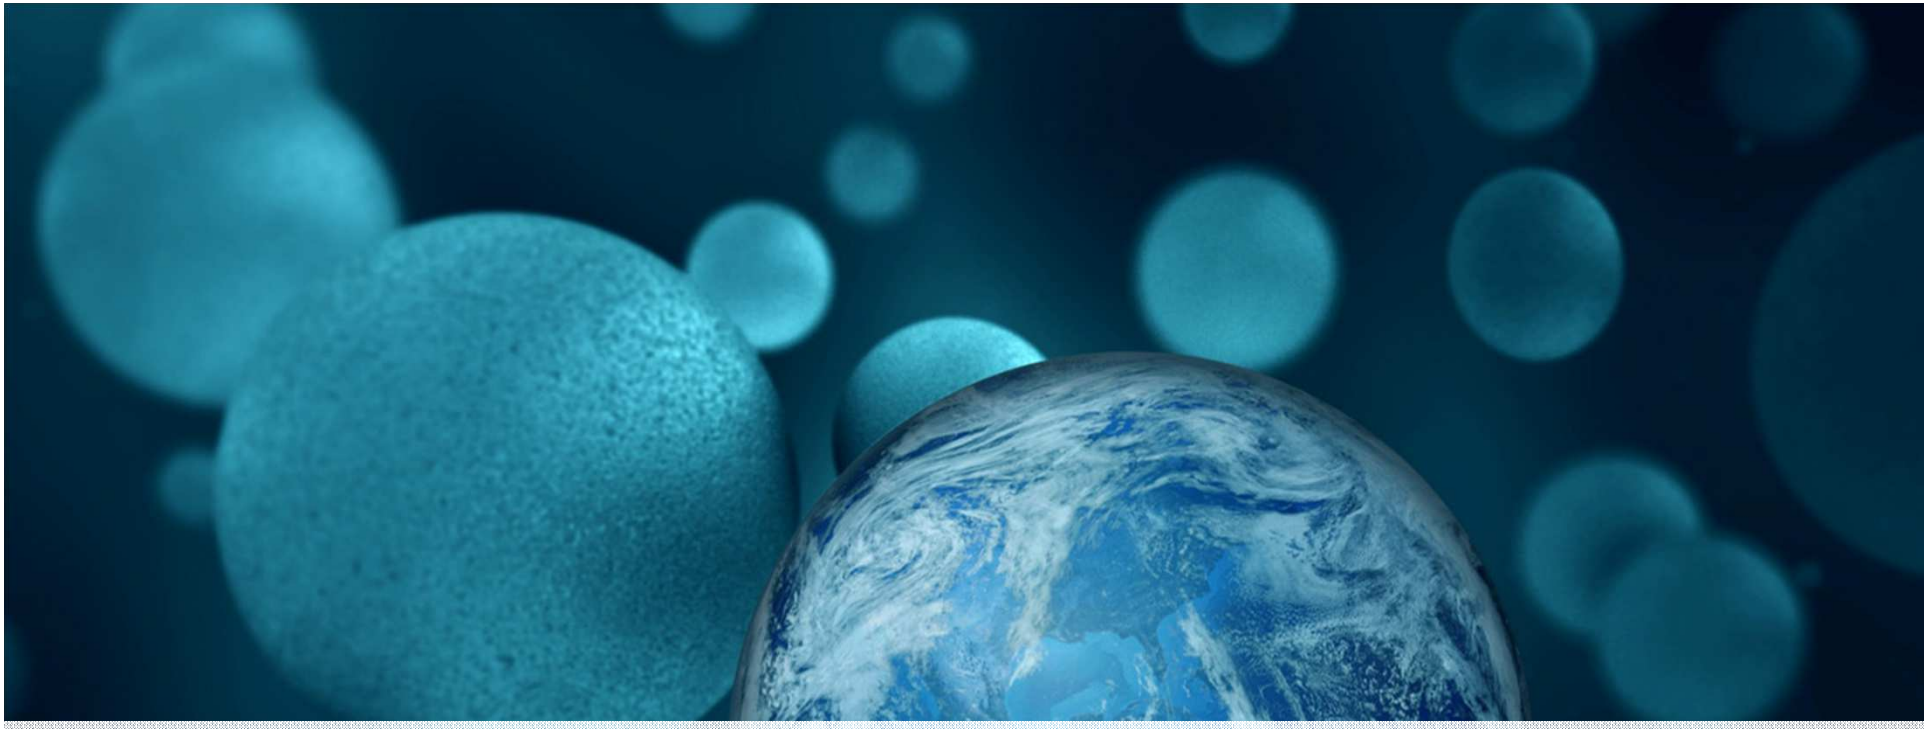
Suggestions for the Trainer...

- This is the system overview presentation for both QS3 and QS5
- Please prepare yourself according to the type of the SSO
  - Half day SSO (mostly for QS3) – the time for this intro is 20 minutes
  - Check the slides and reduce the content as needed
  - Full one day SSO (mostly for QS5) – the time for this intro is 60 minutes

- The slide deck contains two parts
  - About the instrument
  - About the software (Design & Analysis)



ThermoFisher SCIENTIFIC

QuantStudio™ 3 & 5 Real Time PCR Systems

Letizia Gerace
Senior qPCR/CE Application Scientist

Instrument Features

- Touchscreen
- 10 GB of Onboard Memory (2,000-5,000 run files)
- Wi-Fi connectivity, enabling remote monitoring
- Low maintenance
- Factory calibrated for Applied Biosystems™ reagents
- Browser Based Software (Cloud), enabling PC/MAC compatibility

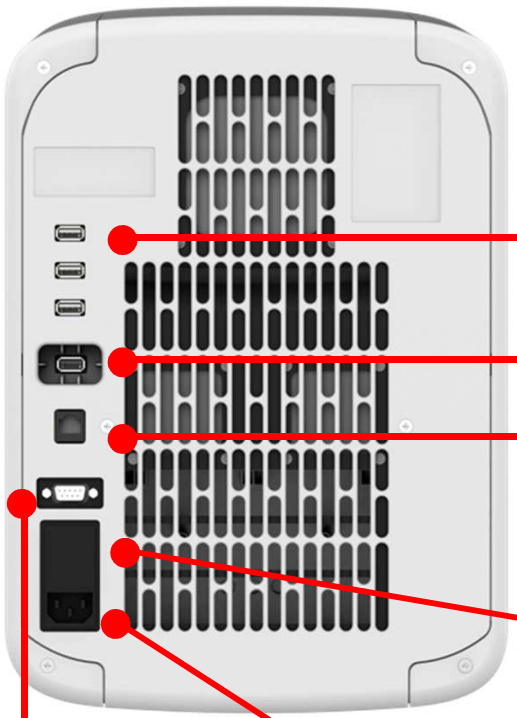
ThermoFisher SCIENTIFIC

Instrument Front & Rear Features

Touchscreen (stand-alone capabilities, PIN-protected user accounts, and dye calibration/RNaseP functionality)

USB port for template upload and data download

Motorized block drawer (controlled by touchscreen)



USB ports

WiFi adapter port (optional use)

Ethernet port : RJ45 (10/100Mbps)

Fuse cover

Power port: 100/240 VAC

RS232 port (Service only)

ThermoFisher SCIENTIFIC

Technical Specifications

	QuantStudio™ 3 Real Time PCR System	QuantStudio™ 5 Real Time PCR System
Block configurations	96-well 0.1 ml block :10-30 µl 96-well 0.2 ml block : 10-100 µl	96-well 0.1 ml block :10-30 µl 96-well 0.2 ml block : 10-100 µl 384-well: 5-20 µl
Run time	<30 minutes	96-well block: <30 minutes 384-well block: <35 minutes
Excitation source	Bright white LED	Bright white LED
Optical Detection	4 coupled filters	96-well block: 6 decoupled filters 384-well block: 5 coupled filters
Temperature Zone Function	3 VeriFlex zones	96-well block: 6 VeriFlex zones 384-well block: N/A
Temperature Accuracy and Uniformity	0.4 ^{0}C & 0.2 ^{0}C	0.4 ^{0}C & 0.2 ^{0}C
Max block ramp rate	96-well 0.1 ml block: 9 ^{0}C/sec 96-well 0.2 ml block: 6.5^{0}C/sec	96-well 0.1 ml block: 9 ^{0}C/sec 96-well 0.2 ml block: 6.5^{0}C/sec 384-well block: 6.0 ^{0}C/sec
21 CFR p11 enablement	No	Yes, with no additional fees
Detection Sensitivity	10 log dynamic range sensitivity 1 copy 1.5 fold differences in target quantities	10 log dynamic range sensitivity 1 copy 1.5 fold differences in target quantities

VeriFlex™ Blocks

- Independent temperature control in each zone (more precise than gradient)
- Can program at will, including multiple zones with same temp (Temp. difference between adjacent zones <5°C)
- Great for optimization and also running multiple assays at the same time

ThermoFisher SCIENTIFIC

Instrument Configurations: Stand-alone, Desktop, or Online

Connected Laptop with QuantStudio Design and Analysis desktop software

WiFi

LAN

Connect to the Design and Analysis Cloud software using any device with a compatible web browser

USB

Note: You can start an experiment run only from the instrument touchscreen or from the Desktop Software

Ability to Connect Multiple Instruments

- Single software to connect and control all QuantStudio 3/5 instruments in the lab
- Seamless integration with instruments that helps minimize manual data transfer

ThermoFisher SCIENTIFIC

How the Cloud is utilized with QuantStudio™ 3 & 5

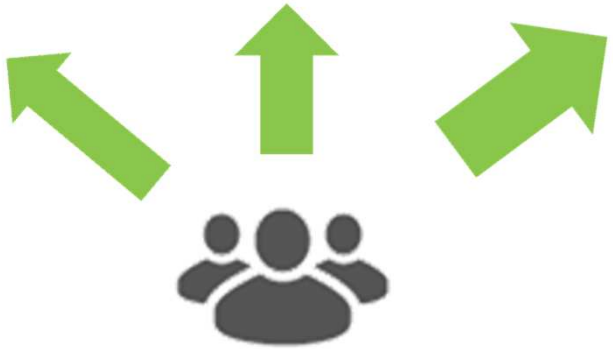
ThermoFisherCloud

- Access/share data
- Analysis Apps
- Browser Based
- Storage and Backup

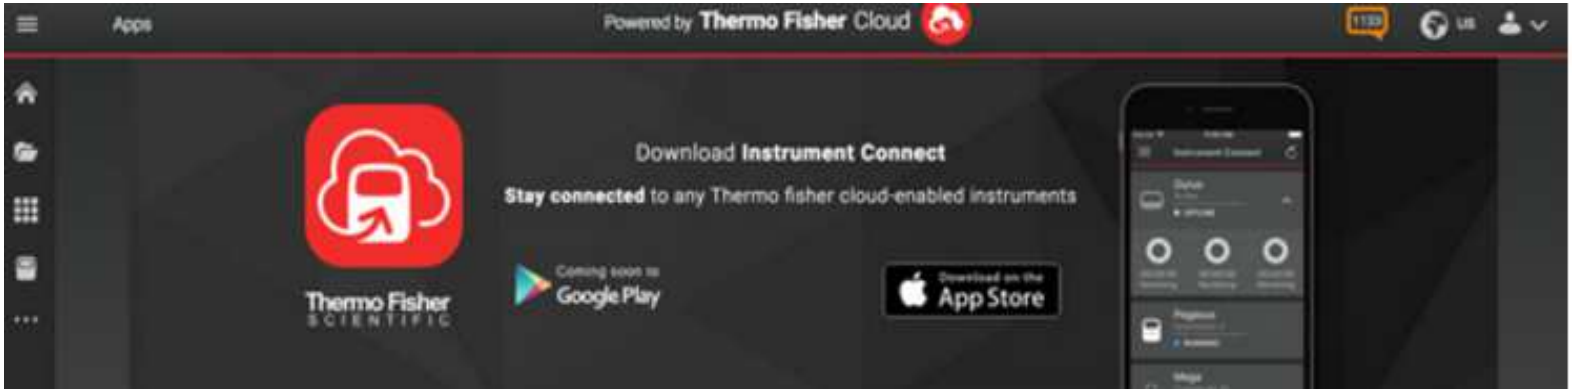
- Create Studies
- Analyze Data with Apps
- Setup run/plate
- Monitor Run
- View Results

- Load run/plate
- Perform Run
- Monitor Run
- View Results
- Calibration

- Monitor Run
- View Results



Instrument Connect Mobile App



Monitor your runs on multiple devices

ThermoFisher SCIENTIFIC

Interactive Touch Screen

Open/Close door

Help

Sign In or Create a Local User Account

Connection type

Settings:
- Calibration
- Runs
- Logs
- Ship Prep

ThermoFisher SCIENTIFIC

Instrument Local User Accounts

Create local pin-protected account on instrument

Connect to online Thermo Fisher Cloud account

ThermoFisherCloud

Optional but highly recommended for full capabilities

- Create individual accounts for multiple users
  - PIN-protected accounts help keep protocols and data safe and stop “accidental” run interruptions
- Instrument users can be designated as “Admin” or “Standard” users
  - First user defaults to “Admin” status but can create other Admins, as needed

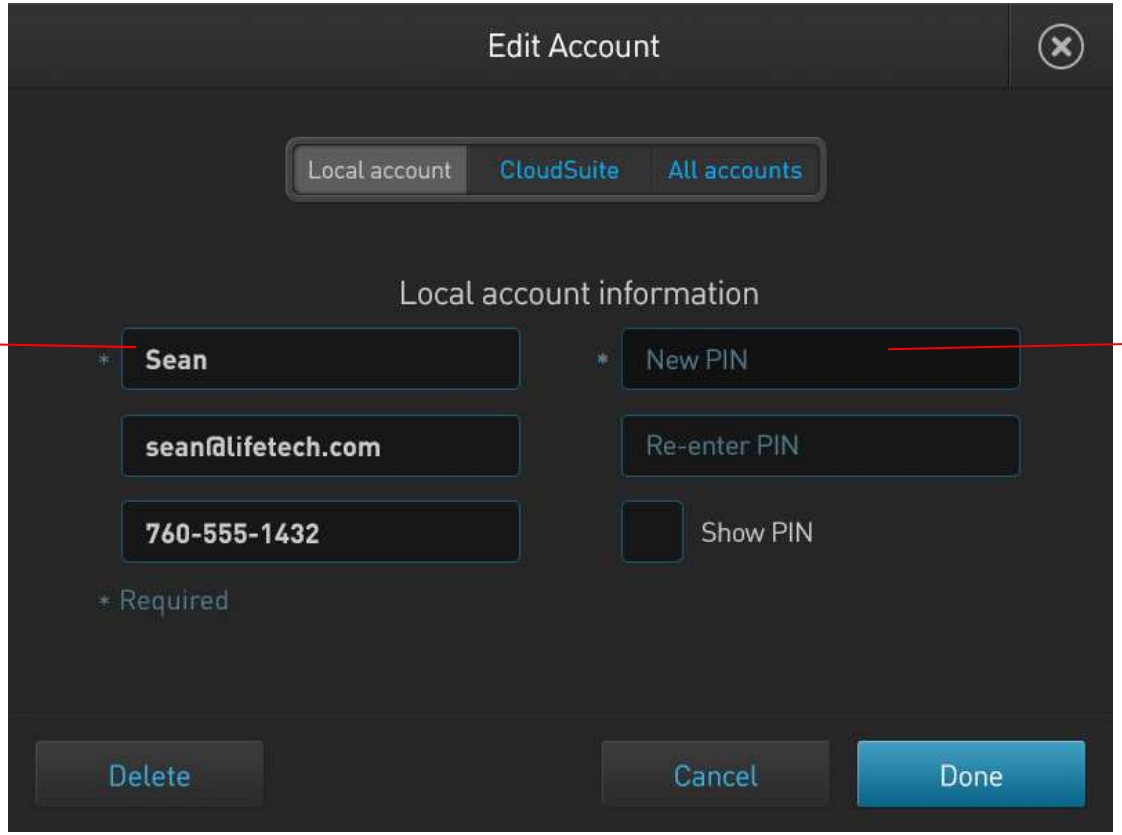
Administrator Only Tasks

- Enable SAE module (QS 5 only)
- Require Sign-In
- Enable Remote Instrument Monitoring
- Update Instrument Software
- Manage/View all Instrument Profiles
- Select Cloud Region
- Manage Sign-Out Timer and Instrument Name

After logging in, Standard Accounts start and save run files in their own folders.

Create Local User Account and Link to Cloud

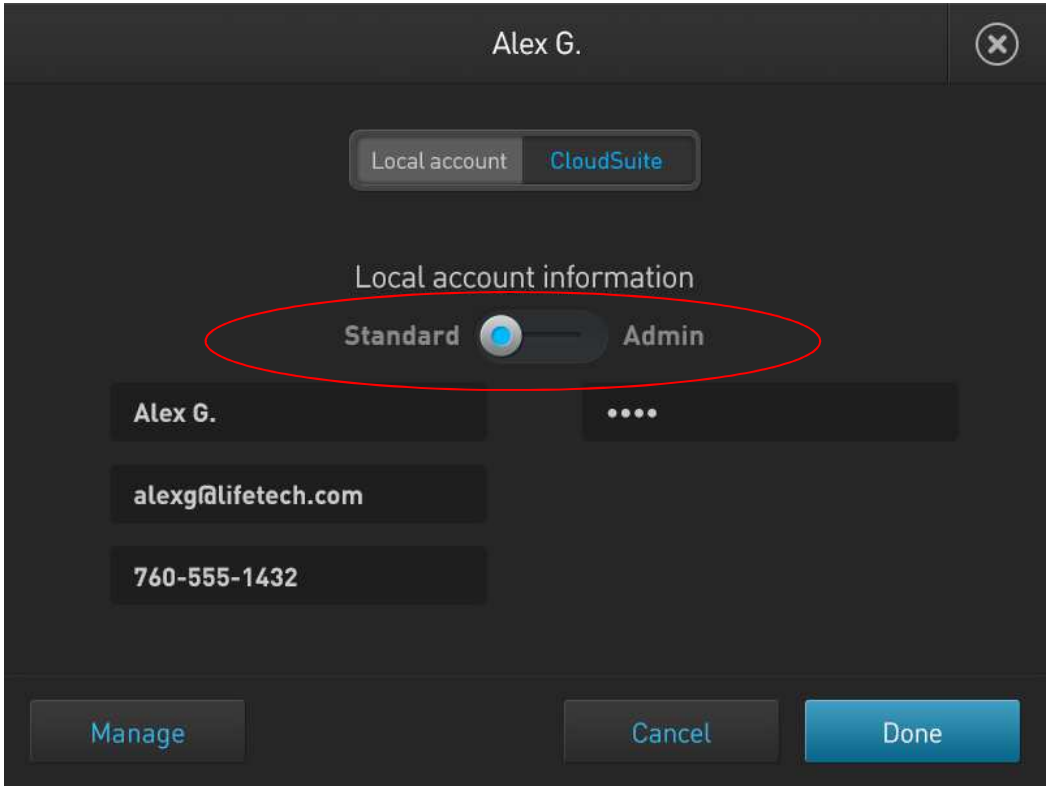
Enter User Name



Set PIN
(and remember it!)

Why link to the Cloud?
The Cloud enables you to download run files from the cloud and automatically upload them when complete

Admin and Standard User Accounts

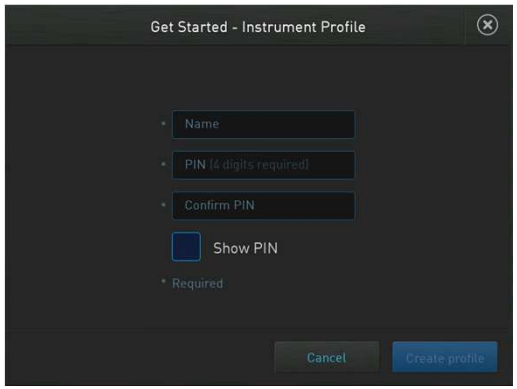


Note: the first user with “Admin” status to connect to the Cloud will be the Cloud Admin for that linked instrument

Account Setup on Touchscreen

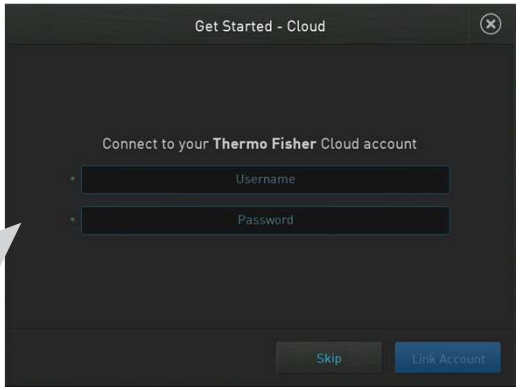
One Step
Instrument Profile Setup

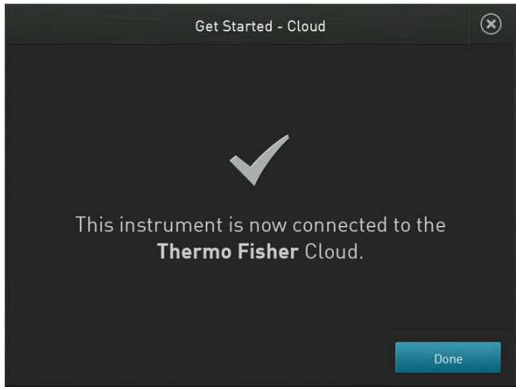
- Enter Name &PIN
- Select “Create Profile”



Optional Step to link to Thermo Fisher Cloud Account

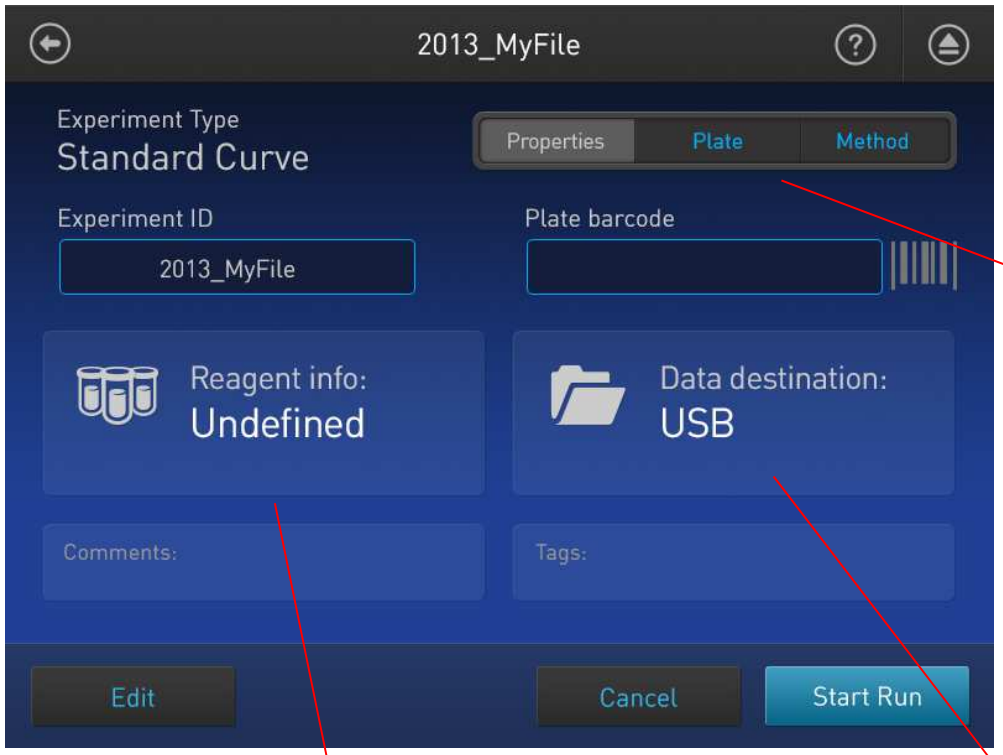
- Enter Thermo Fisher Cloud account credentials & select “Link Account”
- Or select “Skip” to complete setup without linking to cloud account

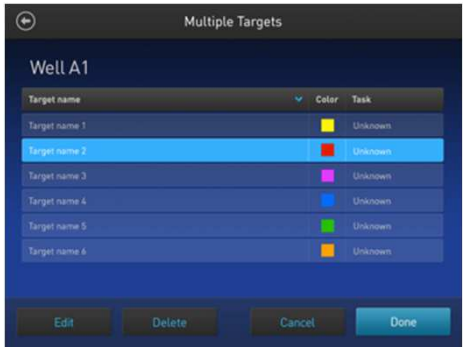


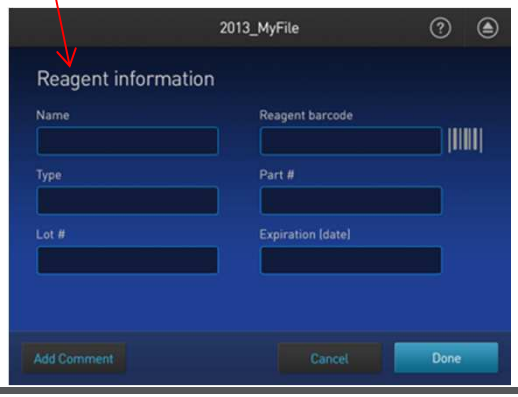


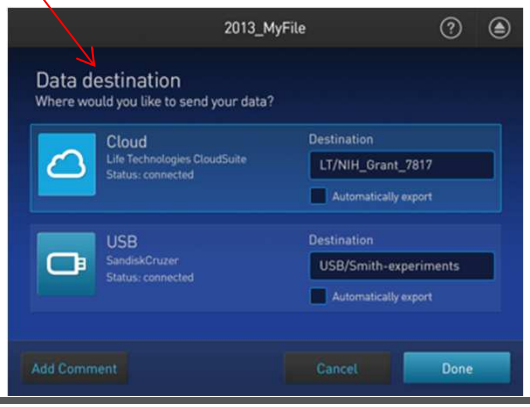
ThermoFisher SCIENTIFIC

Use touchscreen to edit reagent info, destination, and plate setup





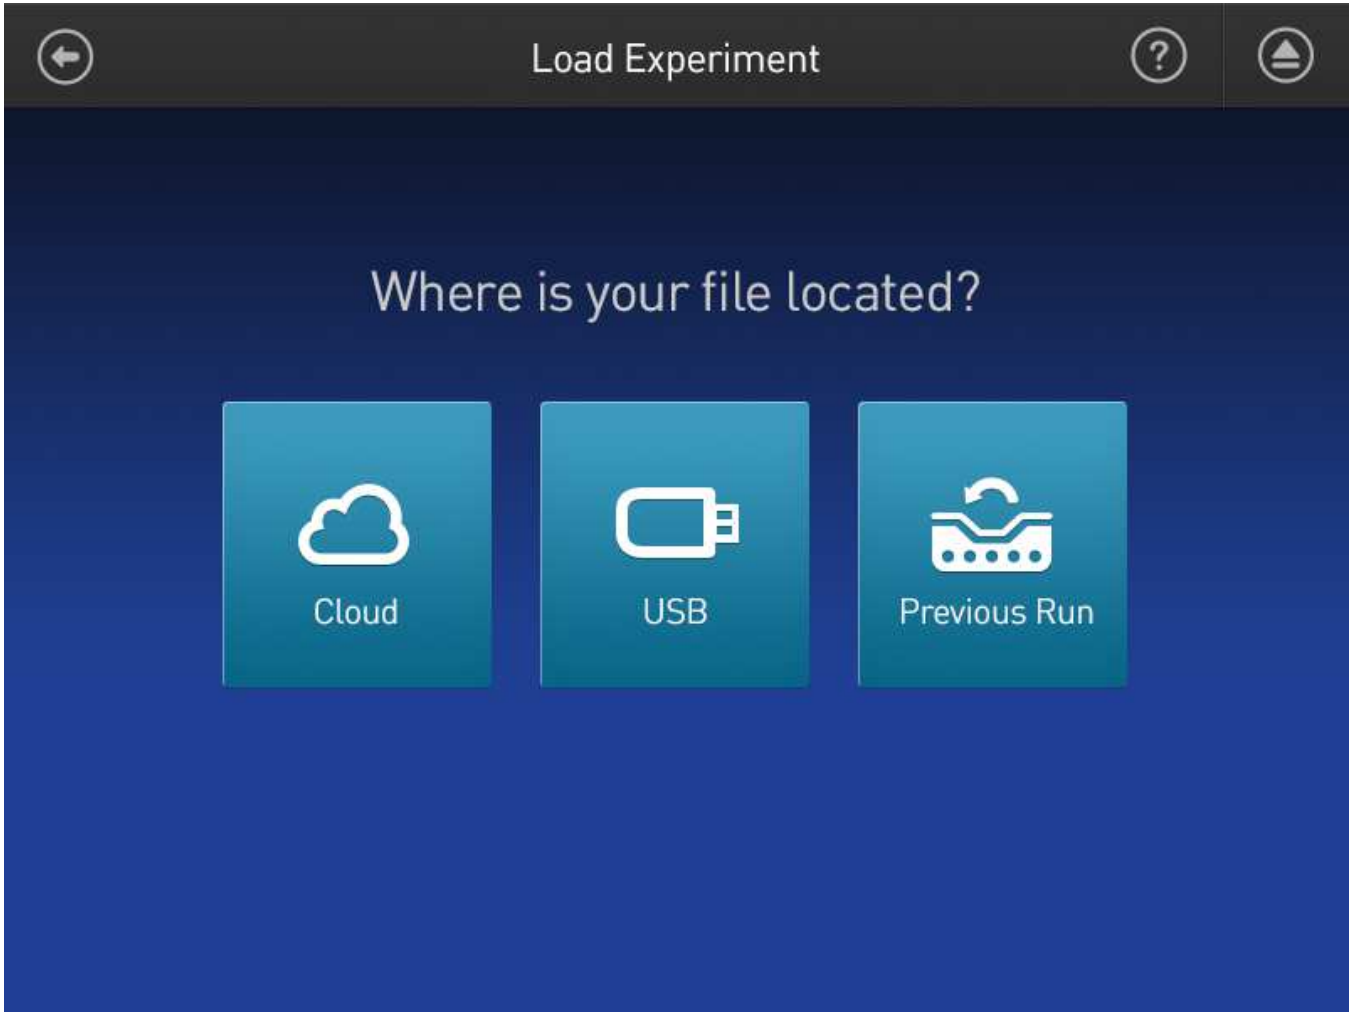




2D reagent barcodes supported for Applied Biosystems reagents!

ThermoFisher SCIENTIFIC

Access run files from multiple locations



ThermoFisher SCIENTIFIC

Edit run protocol

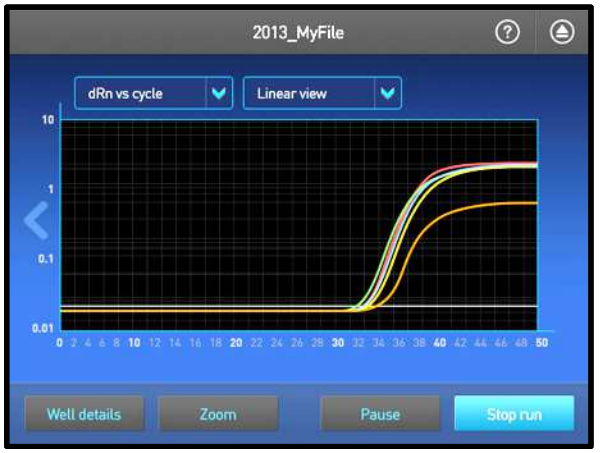
Full method editing capabilities on the touch screen, including VeriFlex, Pause, and Melt

Monitor Progress During the Run

Time Remaining

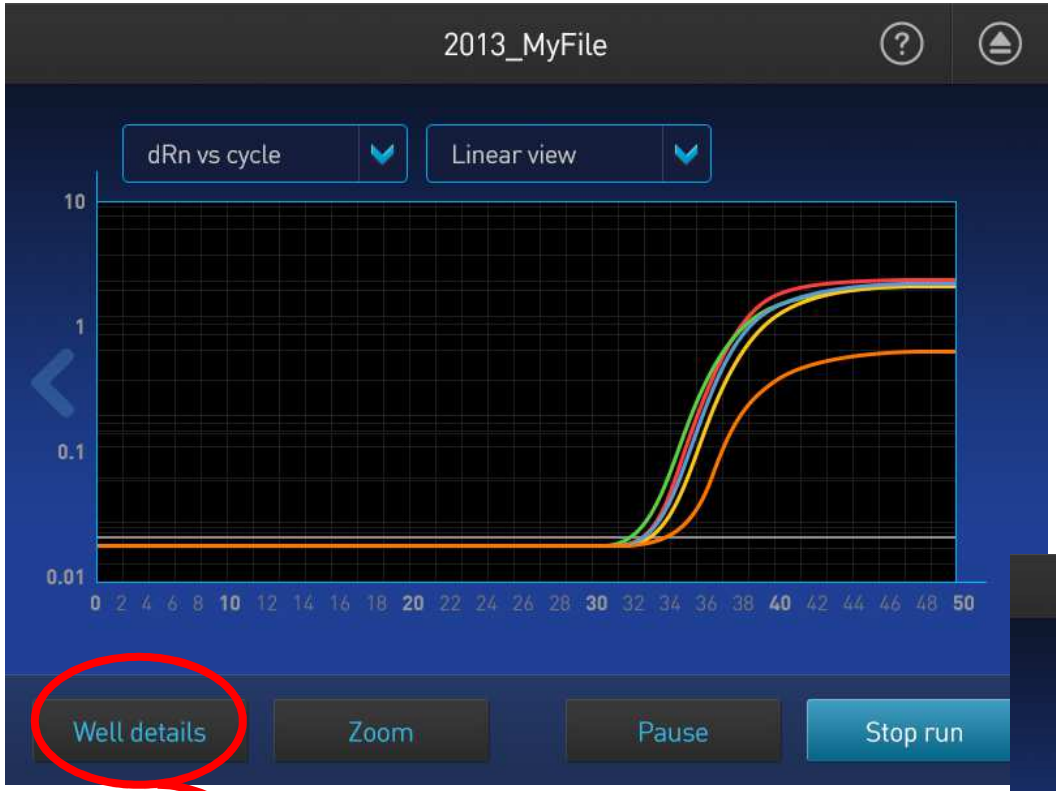
Thermal Protocol Status

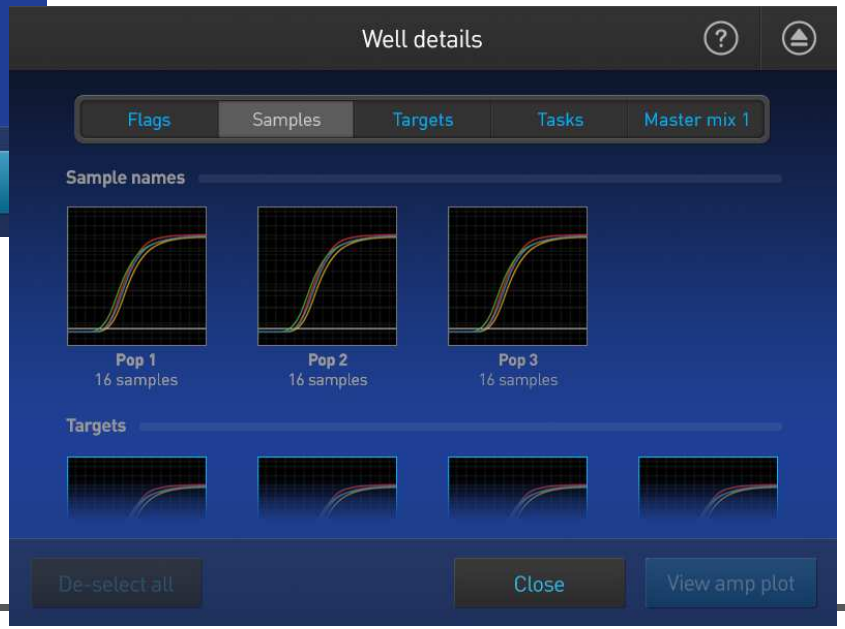
Live Amplification Curves



ThermoFisher SCIENTIFIC

Review amp plots in real time

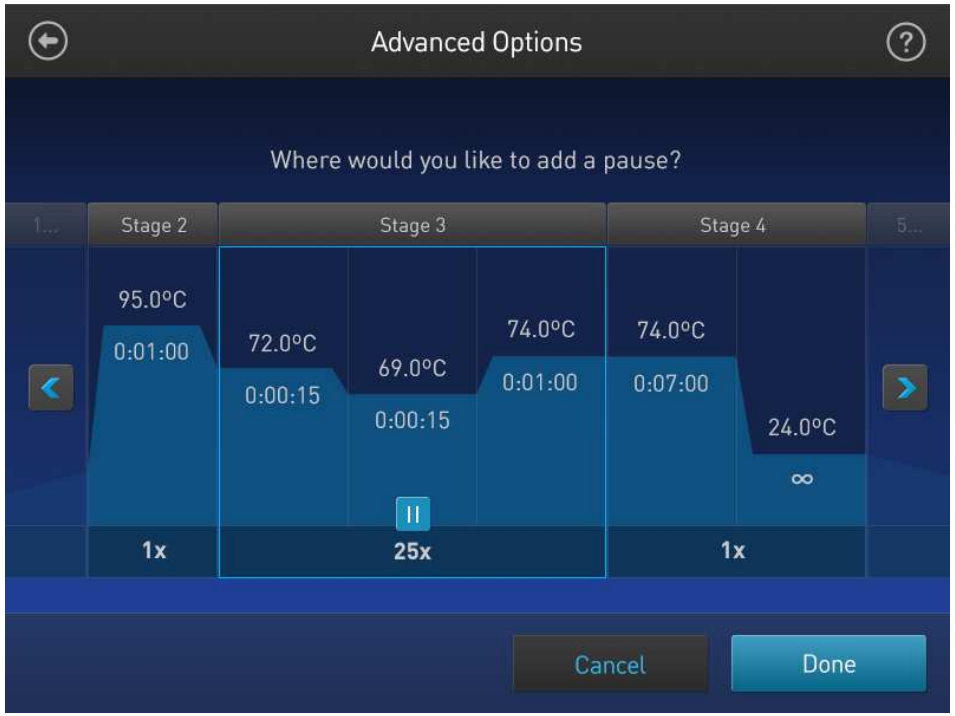




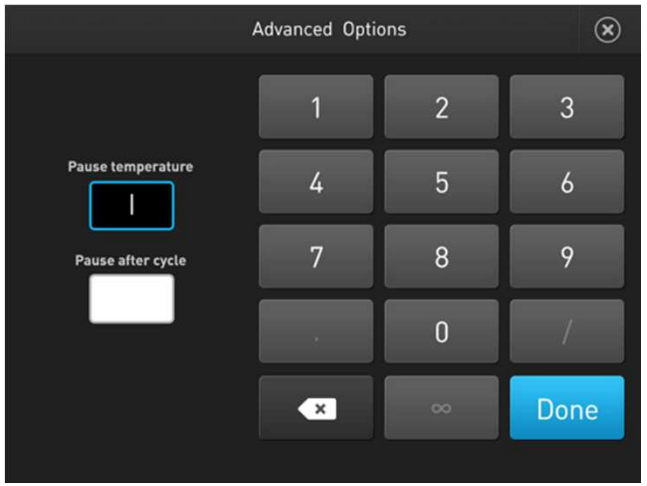
Review well details and select amplification plots to view by Target, Sample, Task, or Master Mix

ThermoFisher SCIENTIFIC

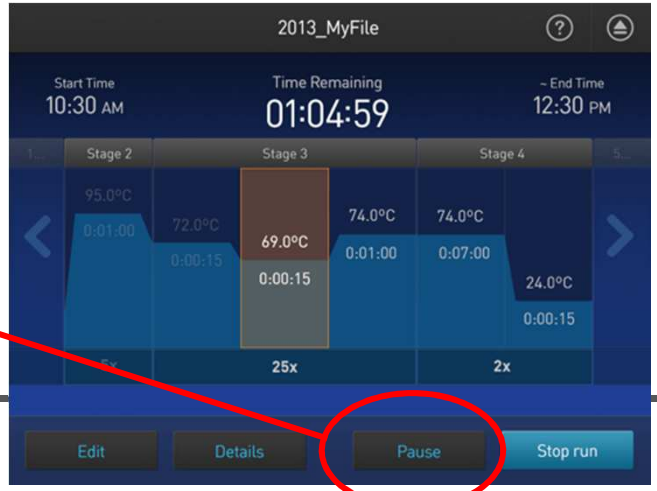
New Feature: Run Pause



Program a Pause into the run: define which step and at what temperature to pause



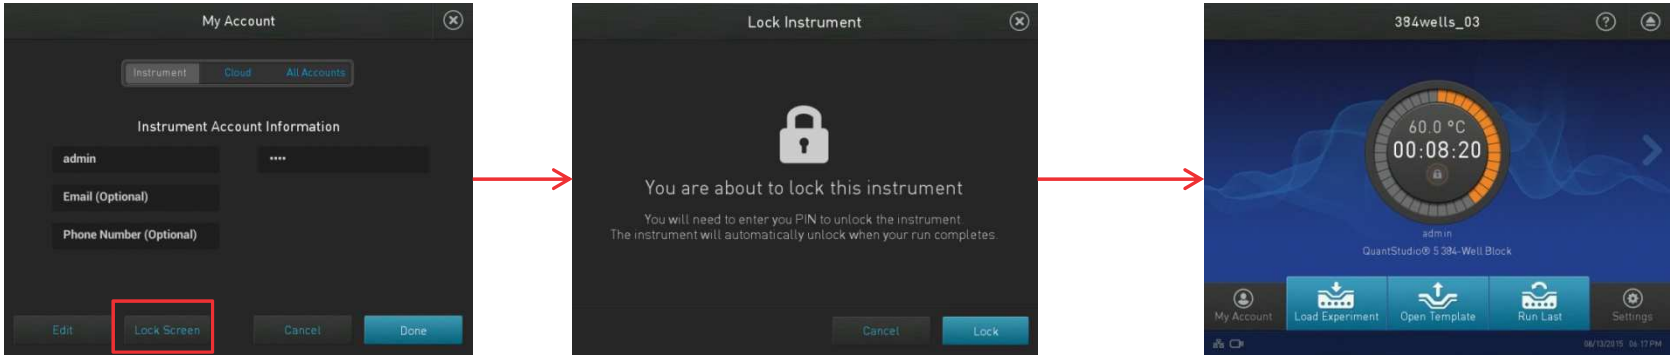
Or pause a run on the fly



ThermoFisher SCIENTIFIC

Enhanced Instrument Touchscreen

- Ability to lock instrument touchscreen during run to prevent run interruptions
  - Only current user and admin can unlock during the run.
  - Anyone can unlock and access instrument after run is completed.

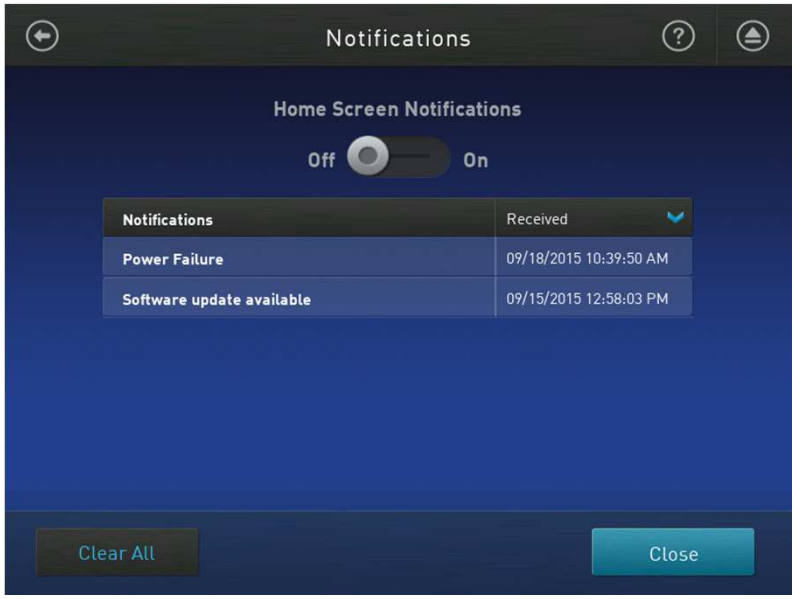


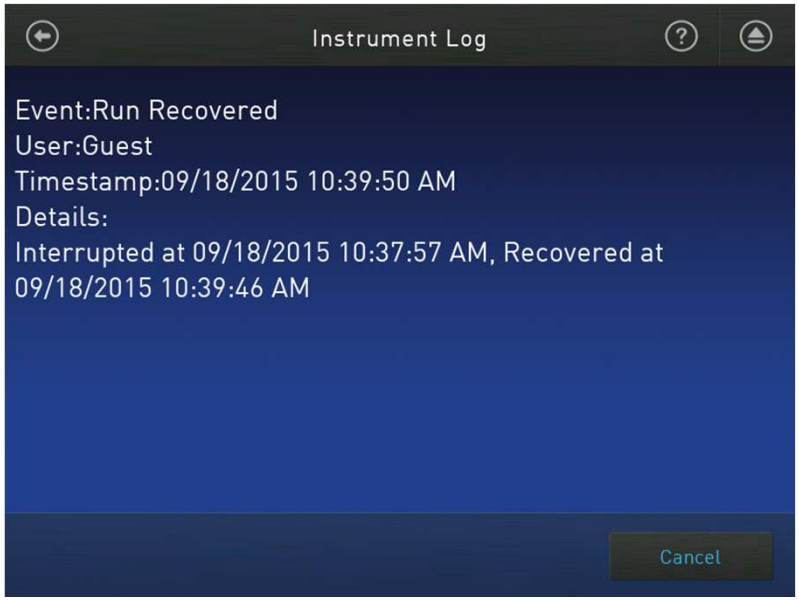
- Ability to transfer run data to/from a ‘Network Location”

ThermoFisher SCIENTIFIC

Enhanced Instrument Touchscreen (2)

- Power Failure Mode
  - On-going run resumed automatically within 30’
  - On screen notifications, Run log & instrument log





ThermoFisher SCIENTIFIC

Options to Upload Data

1. **Cloud = Data saved to user's online account**
2. **USB = Data saved to attached USB drive**
3. **Desktop = Data automatically saves back to desktop if run started from desktop**

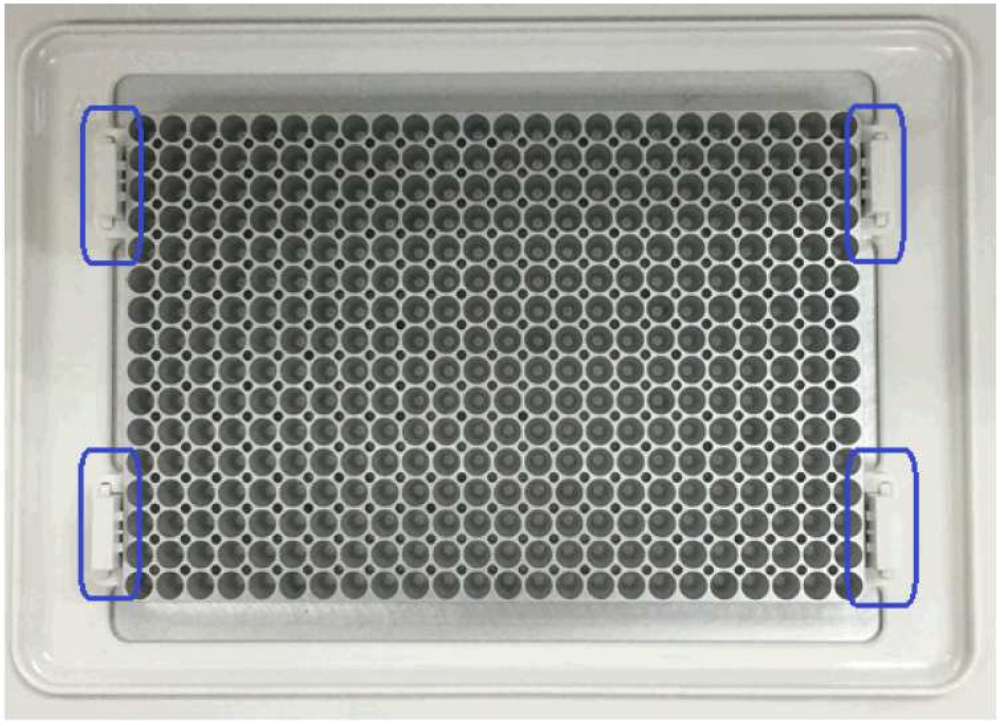
QuantStudio™ 3 & 5 consumables

Disposables – 384 well

Sample block	Consumable	
384-well plate		• MicroAmp® Optical Adhesive Film • MicroAmp® Optical 384-Well Reaction Plate with Bar Code

- Use the proper Plate Adaptor for 384-well block - Ref for reordering 4457087
- Supported volume on 384-well block: 5 to 20µl

Plate Ejector for 384w block



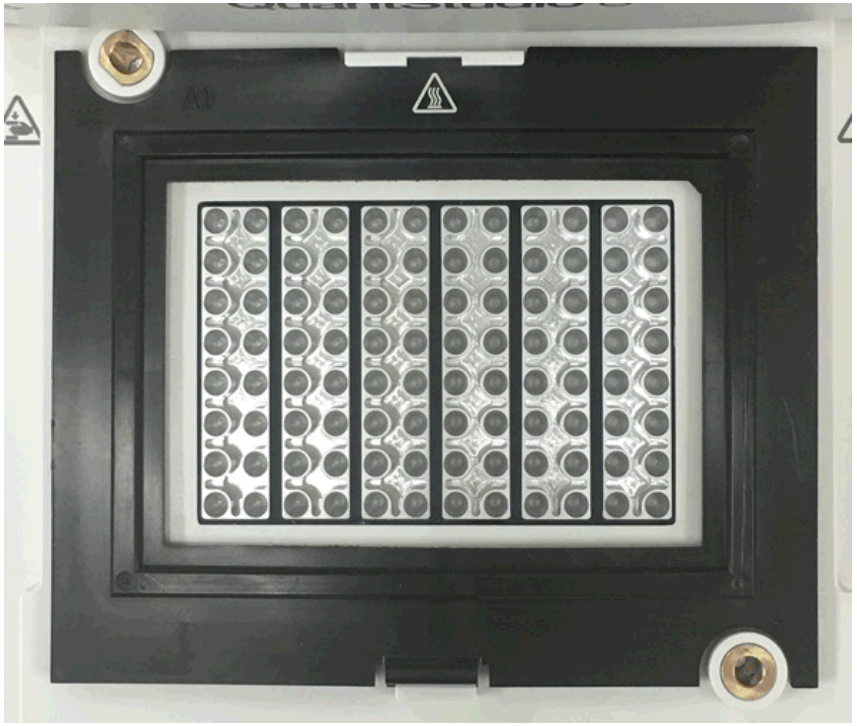
- Plate ejector is part of the machine
- Do not remove.
- No Tubes/Strips available for 384w block

Disposables – 96-well 0.2 ML

Sample block	Consumable	
96-well plate, 0.2 mL		• MicroAmp® Optical 8-Cap Strip • MicroAmp® 8-Tube Strips (0.2-mL) • MicroAmp® Reaction Tubes without Caps (0.2-mL) • MicroAmp® 96-Well Tray/ Retainer Set **4381850**
		• MicroAmp® Optical Adhesive Film • MicroAmp® Optical 96-Well Reaction Plate with Bar Code

- Supported volume on 0.2 ML 96-well block: 10 to 100µl

Plate Ejector & Tray retainer (for 96w 0.2ML block)



- Plate ejector is part of the machine
- Do not remove.

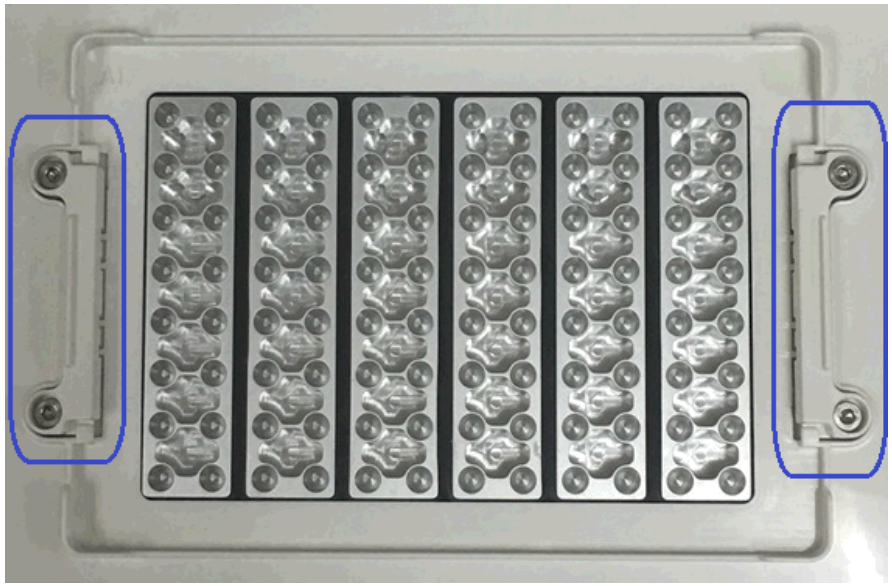
- Tubes/Strips to combine with 4381850
- Tray/retainer set for 96w 0.2 ML block
- Box of 10 tray/retainer set

Disposables – 96-well 0.1 ML

Sample block	Consumable	
96-well fast plate, 0,1ml		• MicroAmp® Optical 8-Cap Strip • MicroAmp® Fast 8-Tube Strips • MicroAmp® Fast Reaction-Tube w/ caps • MicroAmp® Fast 96-Well Tray /Retainer **4379983**
		• MicroAmp® Optical Adhesive Film • MicroAmp® Optical 96-Well Fast Reaction Plate with Bar Code

- Supported volume on 0.1ML Block: 10 to 30µl

Plate Ejector & Tray (for 96w 0.1ML block)



- Plate ejector is part of the machine
- Do not remove.

- Tubes/Strips to combine with 4379983
- Tray for 96w 0.1 ML block
- Box of 10 trays

How to use single tubes and tube-strips

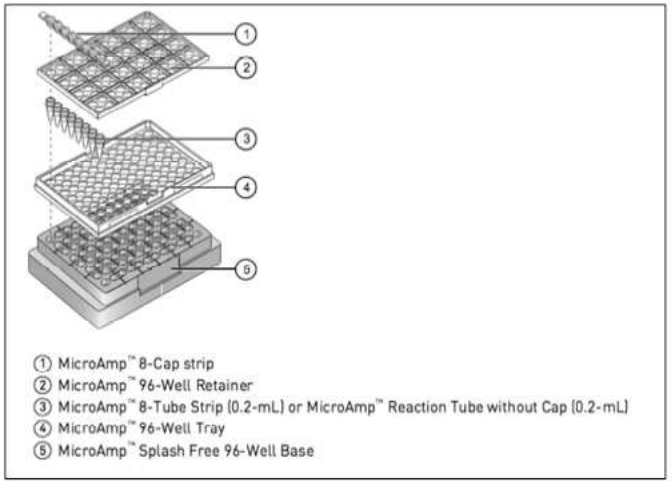
appliedbiosystems

Using Applied Biosystems™ MicroAmp™ Tubes and Strips with a Tray/Retainer on the Applied Biosystems™ QuantStudio™ 3 and 5 Real-Time PCR Systems

When using individual 0.1/0.2ml tubes and strips on the QuantStudio 3 and 5 Real-Time PCR 96-well Systems the following adaptations should be made :

1. Assemble the MicroAmp tubes/strip and caps on the Blue Tray/Retainer (SKU 4381850 for 0.2ml or SKU 4379983 for 0.1ml) following the instructions available online at:

https://tools.thermofisher.com/content/sfs/manuals/100033471_MicroAmpReactionPlates_TubeStrips_Tubes_UB.pdf



① MicroAmp™ 8-Cap strip
② MicroAmp™ 96-Well Retainer
③ MicroAmp™ 8-Tube Strip (0.2-mL) or MicroAmp™ Reaction Tube without Cap (0.2-mL)
④ MicroAmp™ 96-Well Tray
⑤ MicroAmp™ Splash Free 96-Well Base

2. Once the tubes/strips are securely capped, place the blue Tray/Retainer on the instrument block with the black adapter on the block:

- Plastics should be optical
- Seal properly with the required tools
- Use the proper tray/adapter
- Balance the tube positions

ThermoFisher SCIENTIFIC

Recommendations

- Prepare the 96-plates in a MicroAmp Splash Free 96 well base
- This base can protect plate wells from the bottom
- Also can hold the plate fix while pipetting
- Catalog number to order: 4312063 (box of 10 bases)

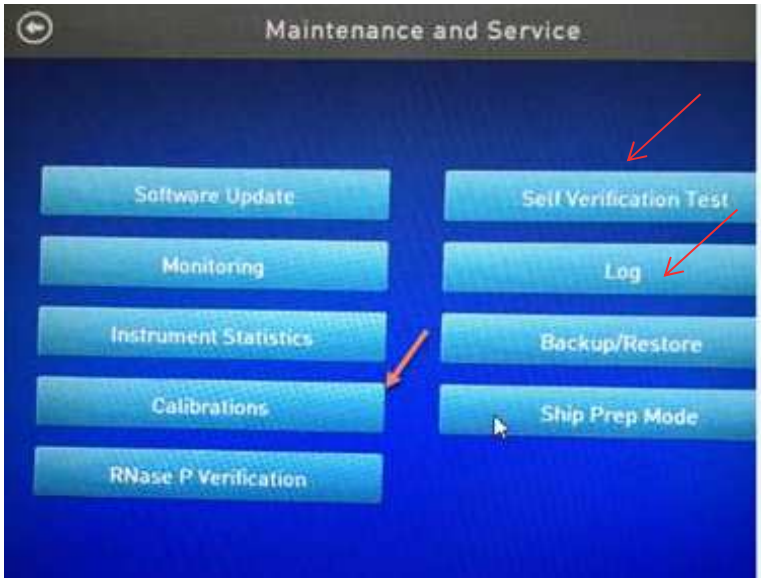
- Centrifuge the plate 1 min x 900g
- Do not use markers on the plates/tubes

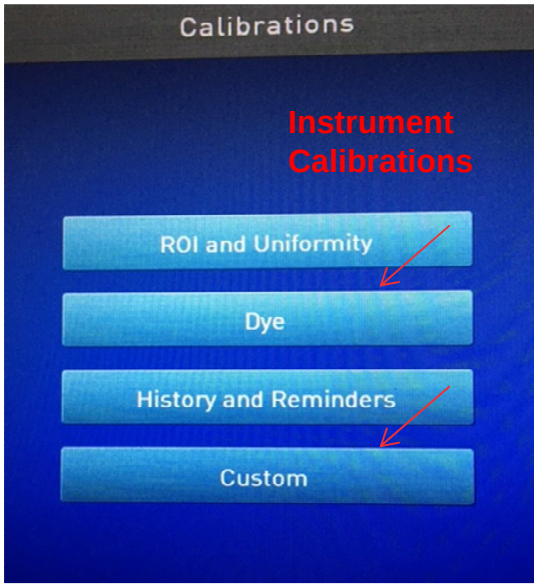
Maintenance & Service

Recommended Maintenance and Calibration

Frequency	User-performed maintenance task
Weekly	Check disk space and power off the instrument for at least 30 seconds
	Clean the instrument surface with a lint-free cloth
Monthly	Perform a background calibration (to check for thermal block contamination)
	Run disk cleanup and defragmentation
	Perform instrument self-test
Every 2 years	Perform ROI, uniformity, dye, and normalization calibrations
As needed	Perform an RNase P instrument verification run
	Replace the instrument lamp

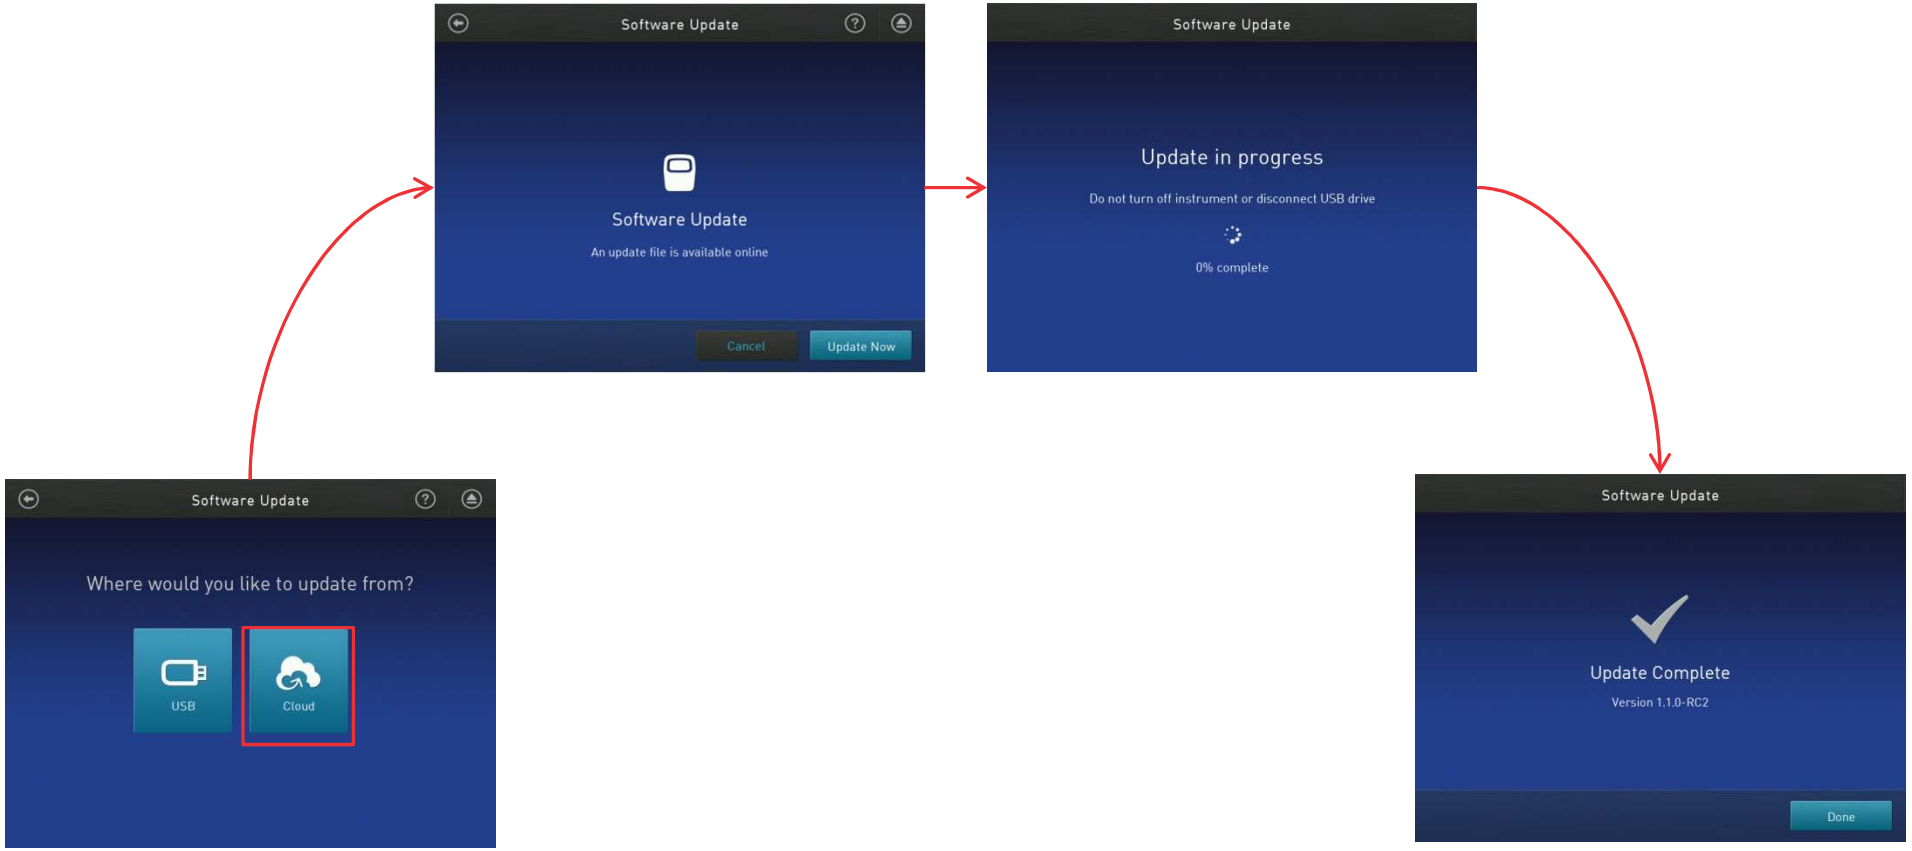
Background, Dye calibrations and Log files





- For instrument malfunctions, please perform the self verification test and export the log files

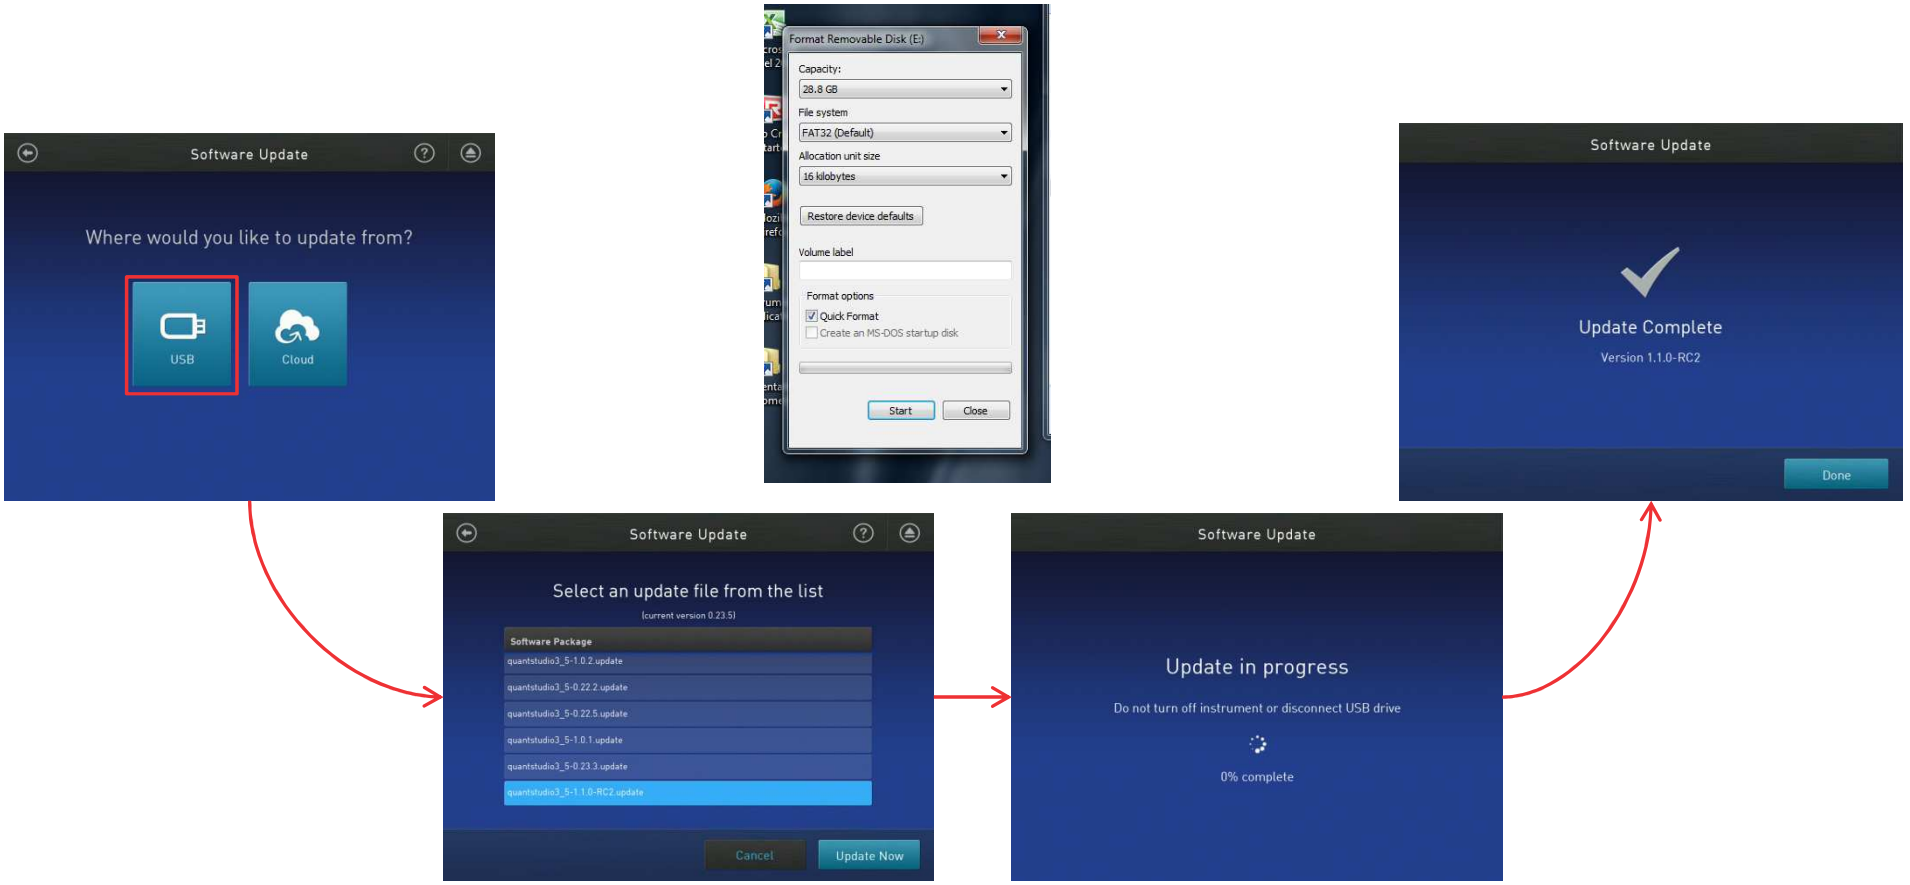
Firmware upgrade from the cloud



On eGUI, Firmware Upgrade for a cloud connected instrument:
Settings>Maintenance and Service>Software Update

Firmware upgrade via USB

- Go to QS D& A Software Download Webpage
- Click on “Download” next to the “Firmware” option and download file to USB drive
- Attach USB drive to instrument and, on eGUI, Settings>Maintenance and Service>Software Update



ThermoFisher SCIENTIFIC

QuantStudio 3 and 5 - Service Plans

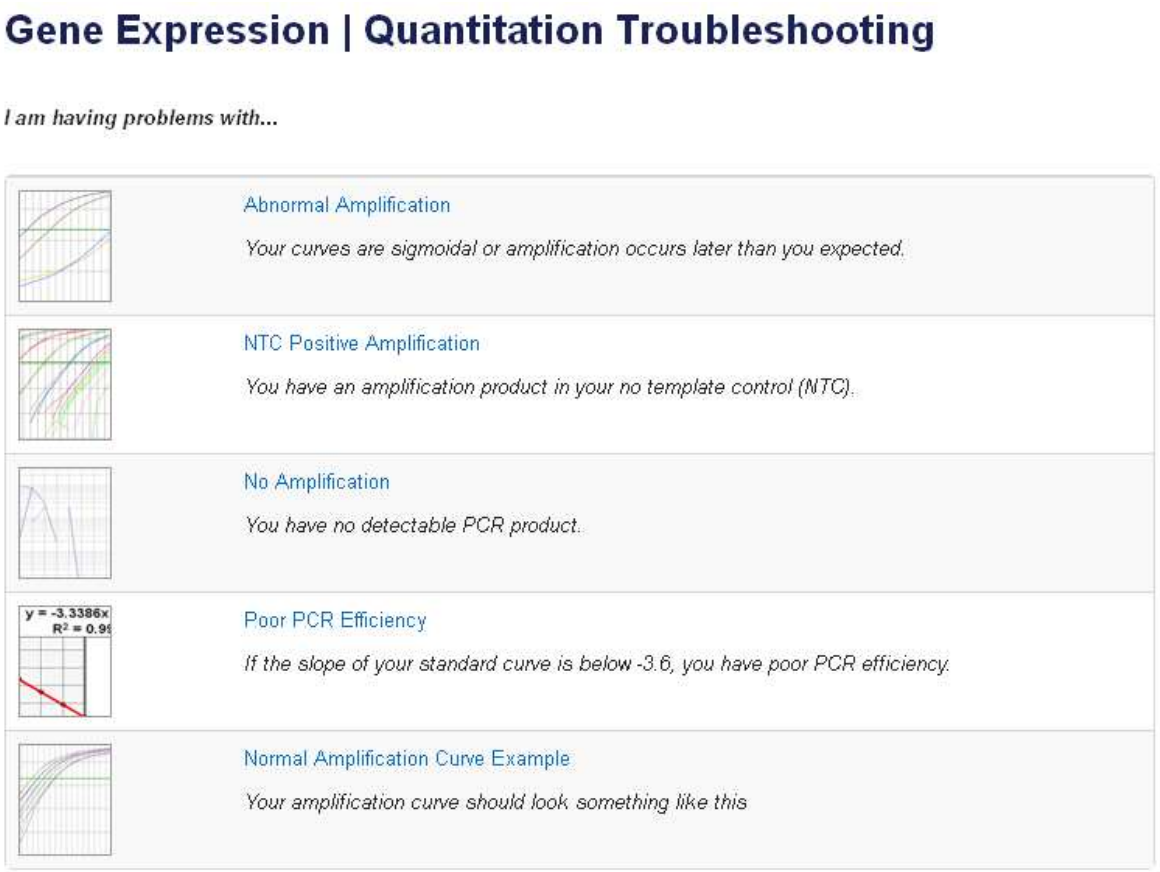
What if the qPCR does not work?

http://www.lifetechnologies.com/fr/en/home/life-science/pcr/real-time-pcr/qpcr-education/real-time-pcr-troubleshooting-tool/gene-expression-quantitation-troubleshooting.html

- Real-Time PCR Troubleshooting Tool



Gene Expression | Quantitation Troubleshooting

I am having problems with...

Abnormal Amplification

Your curves are sigmoidal or amplification occurs later than you expected.

NTC Positive Amplification

You have an amplification product in your no template control (NTC).

No Amplification

You have no detectable PCR product.

Poor PCR Efficiency

If the slope of your standard curve is below -3.6, you have poor PCR efficiency.

Normal Amplification Curve Example

Your amplification curve should look something like this

Thermo Scientific European Training Courses - Scientific Instruments

LabCoat Live Training Series

Events

Get hands-on lab experience and further your working knowledge of applications and instrument operation with our Application Training Courses, available at our Customer Training Centers located throughout the world. Our centers are state-of-the-art laboratories equipped with the latest Thermo Fisher Scientific instruments and products, computer-based interactive training, and the opportunity to collaborate with application scientists.

An award-winning team of application scientists delivers courses bringing hundreds of years of collective experience in using, training, and troubleshooting sequencing, real-time PCR, cell culture, and molecular biology. This knowledge, combined with our world-class facilities, makes us the ideal choice for all of your training needs.

Ramp rate

Block Ramp rate – Technical specifications

Re: Applied Biosystems™ QuantStudio™ 3 and 5 Real-Time PCR System Peak Block Ramp Rates

Dear Valued Customer:

Thank you for your inquiry related to our Applied Biosystems™ QuantStudio™ 3 and 5 Real-Time PCR System Peak Block Ramp Rates. The table below outlines the peak Up and Down Ramp Rates for these systems by block type:

Block Type	Peak (Up Ramp)	Peak (Down Ramp)
96-well 0.2ml	6.5C/s	5.4C/s
96-well 01.ml	9.0C/s	7.7C/s
384-well	6.0C/s	4.8C/s

Sample ramp rate – User can set this in the software

- User can set two parameters
  - Reaction volume
  - Sample ramp required

... and actual block ramping is calculated by a proprietary algorithm.

ThermoFisher SCIENTIFIC

Maximum programmable sample ramp rate per volume

96well 0.2ml

Vol	UR	DR
1	3.66	2.87
10	3.48	2.70
50	2.74	2.12
100	1.94	1.80

96well 0.1 ml

Vol	UR	DR
1	4.81	3.71
10	4.50	3.44
20	4.14	3.16
30	3.76	2.90

384well

Vol	UR	DR
1	2.92	2.15
5	2.57	1.99
10	2.27	1.87
20	1.99	1.76

For Research Use Only. Not for use in diagnostic procedures.
